S1994. You and Fenning were both on your knees tending away. I suppose there was a considerable mass of documents tern up in this way 1—No, not much either, for I had only been sorting them for a little while, and intended to finish in afterwards, and they were taken away before I could do so; a

a mass of papers were cold: the majority of the pa-pers belonged to the offer, and were old objections from the revision, and different papers that had been cellected 31935. How did they happen to get in smoon the election papers to They did not. They were not mixed with them there, but after they were sulling. There

\$3014. Did you destroy ony letters !- No; I think \$2015. Would you undertake to say that you did not!-Oh, I would not undertake to say; for if I read a latter and found it of no use I may have destroyed it. 32016. Suppose you found a letter from a votor enving he was very anxious to vote the way his princoolea directed him, but that he looked for a little em-

ployment, or consideration, or something of that kind, designs every one of those because once the election was over, I and not think it accessary if there was a hox fell of those, and I had them, I would have horned them, or depr anything whatever with them, 32017. You did not look on them as of any value ? ... I did not look on then as worth keeping; we had not room to keep all those peyers. \$2018. I don't know when he sald

I think he got e man to self them. 32032. The object was to got them out of that !the same time to sell all the old objections from court, and things we did not want 35053 Printed forms !-- Printed forms of objection

-we kept two copies, our for the Town Clerk, and one for the restire. 52004. In the middle of your, as you saw, tearing and surting those papers, when the measure came for you to bring the boxes over to Abbertareet, that typed you, or you would have had it all done! 3207. What time was that—was it immediately after the trial of the election petition or at a later date t —I don't think it was until we were communing to work at the new periods. Indeed I am not sure \$5038. The netition was over and the Judeo pro-

nounced his decision in the beginning of February; you dispesse with Campbell som after thatwithin a mouth, or two or three mentles of it !--Really I could not tell you. You remember that some intimution was \$2009. You remember that some intimation was over i-I think, to the best of my knowledge, what I told Campbell was, that being considered guilty of for the revision would be null and versi, and that he was

not to do snything; but I was paying him his salary. 3240. Did you keep any book busides your book of appount-which is a very proposery document no foultt-to record your transactions !-- Yes 20041. Where is that !-- I have it at the office. 32042. Be good enough to let us see that slee?-I

him his malary from week to week until he roughed? \$2050. And I suppose that was with the knowledge and by the instruction of the body you recommed -ve did not pay him out of your own pecket -Oh no: I unid here out of the funds of the pociety and antered it

22061. In was not an act of your own to nev him! No; I was never told to stop his salary. 32052. But it was considered improduct, you say, considering the position be stood in with reference to Judge Keogh's decision to allow him to

take any active part in the work 5—Yea.

32032. Do you recollect his coming back to the office of survives 1-I do 12072. Did you not take over those in consecuence 35054. Can you tell us, approximately, when that been a menth or two before the 4th of August.
